Comments on "Exposure to Grocery Prices and Inflation Expectations" by D’Acunto, Malmendier, Ospina and Weber

Discussant: Fernando Borraz - Banco Central del Uruguay

CEMLA - 2020
Summary

- Very well written and motivated paper. I enjoyed reading it.
Summary

- Very well written and motivated paper. I enjoyed reading it.
- Impressive analysis of household expenditures (Q and P).
Summary

- Very well written and motivated paper. I enjoyed reading it.
- Impressive analysis of household expenditures (Q and P).
- Policy relevant topic.
Summary

- Very well written and motivated paper. I enjoyed reading it
- Impressive analysis of household expenditures (Q and P)
- Policy relevant topic
- \( \Delta \) Prices of goods that HH buy \( \rightarrow \Delta \) HH Inflation expectations
Comment 1

- It’s hard to give suggestions after comments from editor and four referees. A lots of robustness checks in the paper .....
Comment 1

- It’s hard to give suggestions after comments from editor and four referees. A lots of robustness checks in the paper ..... 

- More explanation of the data. Only two waves of expectations. Average price for the UPC and not individual prices (for stores with point of sales). Sales?
Comment I

- It’s hard to give suggestions after comments from editor and four referees. A lots of robustness checks in the paper ..... 

- More explanation of the data. Only two waves of expectations. Average price for the UPC and not individual prices (for stores with point of sales). Sales?

- Gasoline prices at the county level as exploratory variable?
It’s hard to give suggestions after comments from editor and four referees. A lots of robustness checks in the paper ..... 

More explanation of the data. Only two waves of expectations. Average price for the UPC and not individual prices (for stores with point of sales). Sales?

Gasoline prices at the county level as exploratory variable?

Consumers who change stores/goods to buy cheaper?
Comment II

- Time-HH FE? Grocery stores FE?
Comment II

- Time-HH FE? Grocery stores FE?

- Level of financial and economic information of households
Comment II

- Time-HH FE? Grocery stores FE?
- Level of financial and economic information of households
- Placebo exercises: HHs similar to "professional forecasters". Financial sector?
Comment II

- Time-HH FE? Grocery stores FE?
- Level of financial and economic information of households
- Placebo exercises: HHs similar to "professional forecasters". Financial sector?
- Clustered standard errors at the HH-time-county
